PROFILE

2nd year mechanical engineering student with both educational and personal experience with CAD. Seeking a CAD designer role that offers an opportunity to develop new and unique solutions to problems and to provide real purpose behind the work being completed.

EDUCATION & QUALIFICATIONS

University of Newcastle (UON) - Bachelor's degree (Ongoing)

ENGG1500 - Introduction to Professional Engineering - 84% (Distinction)

MECH1110 - Introduction to Mechanical Engineering - 95% (High Distinction)

MECH1750 - Engineering Materials 1 - 78% (Distinction)

ELEC1310 - Introduction to Electrical Engineering - 75% (Distinction)

KEY SKILLS

- Experience in both Fusion360 and Creo Parametric. I am able to design and develop solutions using CAD and my personal 3D printer.
- As my first year of university was in Computer Systems Engineering, I have considerable experience dealing with computers, am able to independently solve issues with programs, and can quickly learn new software.
- I have experience working in teams as throughout my courses it is required to collaborate to design and produce a solution to given problems. Additionally, throughout my Engineering Materials 1 course, it was required to give weekly presentations of our solutions.

WORK EXPERIENCE

Casual - STEM Enrichment Day/s Assistant | Redhead Primary School, Redhead Nov 2022 to Present

- To assist the school in hosting enrichment day/s including STEM subjects.

Dish Hand - (High School Casual) | Poppy's Home and Garden Cafe Jan 2016 to Jun 2016

- To clean dishes for the kitchen and to occasionally provide customer service by taking and serving orders.

INTERESTS

I enjoy CAD and 3D printing as it allows me to solve unique problems with solutions custom tailored to real world/personal problems. Additionally, I started mountain biking 2 years ago with friends and love the somewhat competitive nature; it has been an ongoing passion since. I also built my first computer when I was 15 and have played video games both competitively and casually since; the team-based and competitive nature of games continues to provide enjoyment to this day.
